

Professional Summary

Information Technology graduate with experience in system implementation, software development and quality assurance,. Capable of developing, testing, and maintaining software solutions by applying sound programming principles and structured problem-solving techniques. Skilled at converting business and user requirements into efficient, maintainable, and well-organized applications supported by comprehensive technical documentation. Adaptable and detail-oriented, with a strong commitment to continuous learning and delivering high-quality, scalable software solutions.

Experience

LBC Express

December 2025 - April 2026

- Analyzed raw datasets and transformed data using Excel and Power Query into structured datasets for Microsoft Power BI dashboards, enabling the marketing and corporate planning team to replace manual spreadsheet analysis with interactive and easier-to-interpret reporting tools.
- Performed manual testing for the LBC mobile application revamp and website feature updates, documenting defects through MS Excel, and collaborating with Project Managers to verify fixes and improve application quality before deployment.

Certifications

- Certiport IT Specialist - Cybersecurity: [Certiport Badge](#)
 - Certiport IT Specialist - Databases: [Certiport Badge](#)
-

Projects

Arpeps (Side Project)

July 2026 - Present

- Developed a full-stack web application that aims to reduce the waste in printing copies for checking of research papers of students in an academic environment by analyzing academic papers through AI-powered processing. Engineered using NextJs, OpenRouter, and Supabase to improve research paper analysis.

Digital Competitors Analysis Dashboard (Internship)

December 2025 - January 2026

- Created a dashboard that consolidated competitor performance across multiple social media platforms and applied a custom ranking formula, enabling the research team to identify gaps in the company's digital presence and support data-driven marketing decisions.

Editorially (Capstone Project)

January 2025 - October 2025

- Collaborated with The Nuntium, the student publication of National University – Dasmariñas, to analyze publishing workflows and design a scalable and maintainable CMS architecture that improved content organization, publishing efficiency, and long-term system reliability.

Skills

- Tools:** OpenAI, Gemini, Claude, Postman
 - Database:** MySQL, NoSQL, Supabase
 - Programming Languages:** HTML, Tailwind CSS, Javascript, Typescript, React.js, Next.js, PHP
 - Version Control:** Github
 - REST API Integration
 - Software Testing
 - Debugging & Troubleshooting
 - Problem-Solving & Critical Thinking
-

Education

National University - Dasmariñas | Dasmariñas, Cavite

2022 - 2026

Bachelor of Science in Information Technology with Specialization in Mobile and Web Application
